

# Interperiting EEG Scans and regions of the brain that correlate to "yes" or "no"

Annabelle Chan

September 2024

## 1 EEG (electroencephalogram)

This article provides a general description on EEG scans. It describes the general reasons on why it's done, any risks that come with it, precautions that should be taken, and what's to be expected when an EEG scan is done on you. Reference EEG\_Mayo\_Clinic.tex for more information.

## 2 UW team links two human brains for question-and-answer experiment

Researchers at University of Washington run an experiment where two players communicate with each other by sending signals to the brain based on there responses (based on their thoughts alone). Reference washingtonu\_experiment.tex for more information.
